₹24.9 lakh spent on Google Ads. No way to tell which patients it bought.

Ten years of account history, read in full. The spend found real demand. What failed was measurement: none of the 19 conversion actions is recording today, and the ads have been off since the balance went overdue.

Three "General Dentistry" campaigns took 85% of all spend. Treatment campaigns (implants, veneers, root canal) got 10%.

Status today

- All campaigns paused. "Make a payment to restart your ads": ₹29,296.99 overdue.
- Conversion tracking: 4 tags inactive, 15 actions with no recent conversions, 0 recording.
- Goals marked "Misconfigured": Submit lead form, Store visit, Download.
- 21 "Page views" counted as results. Page views are not patients.
- Ads disapproved in 3 campaigns (Dental Implants: all ads).
- Live ad copy uses "Painless Procedures" and "Sunday Open". Both need checking against policy and real hours.

What "677 conversions" means

They mix calls from ads, form fills, page views and other actions, with no link to booked or treated patients. Use them as a rough intent signal only. The ₹1.5 lakh figure from our call is likely a recent period; a spend-by-year split is the first thing to pull in week 1.

What the keywords say.

Cost per conversion by keyword and search term, all time. Green paid back best; red burned budget.

FINDING

Local beats "Delhi"

"dentist in malviya nagar" converted at 2–3% for ₹960–1,334. "dentist south delhi" cost ₹20,430 per conversion. The catchment is real and narrow.

FINDING

People want prices

"dentist near me with fees", "teeth cleaning price delhi", "tooth cap price", "implant cost in delhi" are recurring searches with high CTR. Both new sites publish fees.

FINDING

Premium never had a page

Implant searches clicked at 21–31% CTR but implant ads were disapproved and veneer traffic (₹37,783) produced zero conversions with no dedicated landing page.

FINDING

Areas that searched

Saket, Chhattarpur, Munirka, Vasant Kunj, Kalkaji and Karol Bagh all appear in search terms. Karol Bagh is ~15 km away; its campaign had most ads disapproved.

FINDING

Brand is cheap

"goel dental", "goel dental clinic malviya nagar": ₹548–2,060 per conversion. A small brand campaign protects it from competitors.

FINDING

Quality Score drag

Near-me exact and root canal keywords show "Rarely shown (low Quality Score)" and below first-page bid. Better landing pages lower the price per click.

03

Searches mapped to pages.

Each page exists because people searched for it and paid clicks proved intent. Built sections are live in the two prototypes.

07
Before ads restart.

Restarting campaigns on today's tracking would repeat the last ten years. Fix first, then spend.

WEEK 1

Clean the account

Clear the overdue balance only when ready to relaunch. Remove page views as conversions; one primary conversion: qualified lead. Fix disapprovals and claims.

WEEK 1–2

Install measurement

GTM, GA4 key events, call tracking, WhatsApp ref codes, CRM. Test 20 enquiries end to end.

WEEK 3–4

Relaunch narrow

Local core + root canal + implants on the new pages, 5–8 km, during staffed hours. Cosmetic on DDS after.

Needs Dr Goel's input

- Which phone number is primary; WhatsApp Business number
- Floor (Ground vs Lower Ground) and real hours, incl. Sunday (DDS says open)
- Founded 2010 or 2011
- Which branches are active: Kalkaji (CGHS), Kirti Nagar, Kaushambi
- Current team and photos for Dr Ambica Sharma, Dr Parag Gupta
- Confirm every fee on the 2026 list before ads quote them
- Consent for each before/after case and testimonial
- Warranty wording, "painless", "best": DCI ethics and ad-policy review
- Invisalign provider tier; CEREC and CBCT in-house
- Spend by year for the ₹1.5L period discussed; who answers enquiries
