GOEL DENTAL CARE · SOUTH DELHI · PHASE-1 IMPLEMENTATION BLUEPRINT V2

Conversion-focused healthcare website, analytics, automation and search infrastructure.

What will be built, connected, tracked, tested, deployed and monitored in Phase 1, including the seven requirements Dr. Goel asked to make core.

33
roadmap steps

7
client requirements, all core

14
tracked events

₹40,000
Phase-1 implementation fee

Supersedes the 10 Nov blueprint for scope and roadmap. Its research, competitor report and evidence pages remain valid.

02 EXECUTIVE SUMMARY

One system, from search to appointment.

Phase 1 replaces the current site with a fast WordPress build and connects it to everything that turns a search into a patient: WhatsApp automation, an AI pre-qualification assistant, booking, server-side tracking, Meta and Google conversion data, local pages, and AI-search-ready content.

CLIENT REQUIREMENT	STATUS IN THIS BLUEPRINT	ROADMAP
1 · Server-side GTM + first-party /gtgtag/	Core Phase 1	07 · 08
2 · AI triage + smile estimator	Core Phase 1	11
3 · WhatsApp Business Cloud API automation	Core Phase 1	09 · 10
4 · AEO + GEO answer blocks	Core Phase 1	22 · 23
5 · Malviya Nagar / Saket / Kalkaji hubs	Core Phase 1	26
6 · Meta Pixel + Conversions API	Core Phase 1	17 · 18
7 · Before/after sliders + brand showcase	Core Phase 1	27 · 28

QUESTION THIS PAGE ANSWERS

What is this project, in one page?

INCLUDED

Fee

₹40,000 Phase-1 implementation fee. Covers all build and integration work in this document. Third-party subscriptions, cloud, WhatsApp/AI usage and ad spend are paid directly by the clinic (p. 47–48).

Timeline

About 8 weeks to launch after approvals and inputs, then 30 days of monitoring (p. 53).

What is not promised

Rankings, AI citations, leads, revenue or a PageSpeed score. Targets are engineering targets; outcomes are measured and reported.

Six objectives, each with a measure.

QUESTION THIS PAGE ANSWERS

What must Phase 1 achieve?

01
Be found
Search, Maps, Apple Maps and AI answers understand who the clinic is, where it is and what it treats.

Measured by: Indexed pages, Maps actions, AI answer mentions (observed monthly)

02
Be chosen
Every page answers price, pain, time and doctor questions and shows real proof.

Measured by: Enquiry rate per page

03
Respond first
Every enquiry gets a WhatsApp reply within ~30 seconds, at any hour.

Measured by: Time to first response

04
Qualify
The assistant and forms separate urgent, high-intent and information-only enquiries.

Measured by: Share of qualified leads

05
Measure
Every enquiry carries a reference code from first click to appointment.

Measured by: Leads traced end to end

06
Protect
Patient data stays separate from marketing data, with consent recorded.

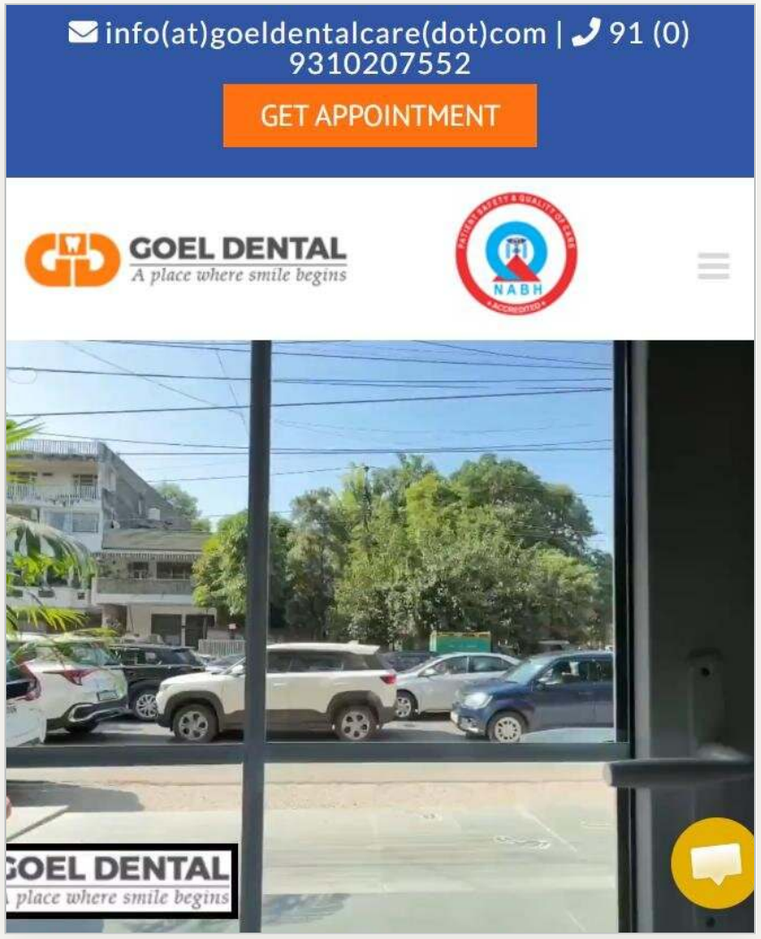

Measured by: Zero health data in ad platforms

04 CURRENT WEBSITE SITUATION

A WordPress site that leaks enquiries and data.

QUESTION THIS PAGE ANSWERS

Where does the clinic start from?

goeldentalcare.com · first screen on a phone, 10 Nov 2026

AREA	OBSERVED 10 NOV 2026	
Platform	WordPress 6.7, Avada theme, Slider Revolution, Site Kit	VERIFIED
Pages	96 URLs with .html addresses, incl. test, sample and payment pages	Fix
Mobile speed	PageSpeed 25 · largest content shows at 18.6 s	Fix
Hero video	12 MB, 1080p, loaded from delhidentalsmiles.com	Fix
WhatsApp	No WhatsApp link on the homepage	Fix
Tracking	GA4 + Ads tag present; 0 of 19 Ads conversion actions recording	Fix
Images	28 of 30 homepage images have no alt text	Fix
Schema	WebPage + Organization only; no Dentist entity	Fix
Maps	4.8★ · 709 reviews · Maps top 3 for 8 of 12 local searches	Strength
Trust	NABH badge, own patient videos, live chat (Crisp)	Strength

Source: page code, sitemap, PageSpeed Insights and Google search on 10 Nov 2026 (blueprint v1, p. 4 and 49–52).

05 PROPOSED DIGITAL ARCHITECTURE

Seven layers, one loop.

QUESTION THIS PAGE ANSWERS

How does the whole system fit together?

TRAFFIC	Google Search · Google Ads · Meta Ads · Google Business Profile · **Apple Business Connect** · **ChatGPT / Perplexity / AI Overviews** · Referral · Direct
WEBSITE	Treatment pages · Doctor pages · **Local hubs ×3** · **AEO / GEO answer blocks** · FAQs · Reviews + videos · **Before / after** · **Brand showcase** · Sticky CTAs
QUALIFICATION	**AI smile estimator** · WhatsApp · Phone · Forms + consent · Booking request
AUTOMATION	**WhatsApp Cloud API** · **Webhooks · lead router** · Reference code GD-XXXXX · Staff alert · **Follow-ups** · Human takeover
MEASUREMENT	Web GTM · GA4 · Google Ads · **Meta Pixel** · **Meta CAPI** · **Server-side GTM** · **First-party /gtgtag/**
OUTCOME	Lead · → Appointment · → Visit · → Offline outcome (status only, no clinical data)
OPTIMISATION	Bids on real appointments · Pages improved from enquiry data · Monthly AI-answer + Maps check

Orange = the seven client requirements, built into the core layers.

06 PHASE-1 CORE DELIVERABLES

Everything below ships in Phase 1.

QUESTION THIS PAGE ANSWERS

What exactly is in Phase 1?

Website

WordPress build from the approved prototype · treatment, doctor, location, fees, FAQ, case and booking templates · 301 map for 96 URLs

CORE INCLUDED

Search

Technical SEO · AEO / GEO answer blocks · schema graph · Search Console · GBP · Apple Business Connect · Malviya Nagar, Saket, Kalkaji hubs

CORE INCLUDED

Conversion

Sticky call / WhatsApp / book · AI smile estimator · booking request · consent forms · before/after cases · brand showcase

CORE INCLUDED

Automation

WhatsApp Cloud API · instant reply · follow-ups · staff alerts · human takeover · lead log

CORE INCLUDED

Measurement

Web GTM · server-side GTM · /gtgtag/ first-party path · GA4 · Google Ads conversions + offline import · Meta Pixel + CAPI · 14-event matrix · reference codes

CORE INCLUDED

Quality

Performance budget · plugin governance · DPDP privacy controls · QA gate · deployment · 30-day monitoring

CORE INCLUDED

Nothing in this list is optional. Third-party subscriptions that some items need are listed separately on p. 48 and paid directly by the clinic.

From approvals to ongoing growth.

- 32 Launch + 30-Day Monitoring — W9–13

GROW

- 33 Ongoing Optimisation — After W13

Weeks (W) count from the date approvals and inputs are complete. Steps 01–32 are in the implementation fee; step 33 is a separate engagement.

08 ROADMAP DETAIL

Steps 01–03.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

01 Planning & Audit

OBJECTIVE	Lock scope, inputs, access and a measured baseline.
TASKS	• Kick-off + approval checklist • Access: domain, hosting, GA4, GTM, Ads, Meta, GBP, Search Console • Baseline: speed, Maps visibility, conversions
DEPENDS ON	Client approvals + account access
DELIVERABLES	Signed scope · baseline report
ACCEPTED WHEN	All access working; baseline recorded and shared
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Plan · W1

02 UX / Information Architecture

OBJECTIVE	Turn the prototype into an approved sitemap and page templates.
TASKS	• Sitemap: treatments, doctors, locations, fees, FAQ, cases, book • Journeys: pain today · planned treatment · cosmetic · local • Mobile-first wireframes from the prototype
DEPENDS ON	01 · services list CLIENT INPUT
DELIVERABLES	Sitemap · template wireframes · journey maps
ACCEPTED WHEN	Client signs off sitemap and templates
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Plan · W1–2

03 Website Development

OBJECTIVE	Build the production theme from the approved templates.
TASKS	• Child theme on a lightweight base (no page builder) • Templates: home, treatment, doctor, location, fees, FAQ, case, book • Components: answer block, CTA bar, slider, brand grid
DEPENDS ON	02
DELIVERABLES	Theme + all templates on staging
ACCEPTED WHEN	Every template passes the mobile review and QA gate
THIRD-PARTY	Theme licence if a premium base is chosen
IN FEE	INCLUDED
VARIABLE COST	Licence ESTIMATE
TIMING	Build · W2–5

09 ROADMAP DETAIL

Steps 04–06.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

04 GitHub / Version Control

OBJECTIVE	Every change tracked, reviewable and reversible.
TASKS	• Private repo: theme, custom plugins, configs, Worker code • Branches: main → staging → production • Deploy + rollback procedure
DEPENDS ON	01
DELIVERABLES	Repository · deploy runbook
ACCEPTED WHEN	A rollback is tested on staging
THIRD-PARTY	GitHub (free plan sufficient)
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Build · W2

05 WordPress Setup

OBJECTIVE	A fast, secure, maintainable WordPress base.
TASKS	• Managed hosting: staging + production • Current WordPress, PHP 8.2+, Cloudflare DNS/CDN/SSL • Roles, 2FA, auto-backups, mail delivery
DEPENDS ON	Hosting purchased by clinic
DELIVERABLES	Staging + production environments
ACCEPTED WHEN	Both environments live over HTTPS; backups verified
THIRD-PARTY	Hosting · Cloudflare (free plan)
IN FEE	INCLUDED
VARIABLE COST	Hosting monthly ESTIMATE
TIMING	Build · W2

06 Plugin / Dependency Governance

OBJECTIVE	No plugin without a reason, an owner and a speed budget.
TASKS	• Approved plugin list (p. 40) • Approval gate for any new plugin • Per-plugin weight + update log
DEPENDS ON	05
DELIVERABLES	Plugin register
ACCEPTED WHEN	≤ 15 active plugins, each registered with purpose and owner
THIRD-PARTY	Premium licences only if approved
IN FEE	INCLUDED
VARIABLE COST	Licences ESTIMATE
TIMING	Build · W2

Steps 07–09.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

07 Server-Side GTM

OBJECTIVE	Move tag processing from the phone to a server the clinic controls.
TASKS	• Provision sGTM (managed Stape or DigitalOcean) • GA4 + Meta clients, health checks • Preview / debug workflow
DEPENDS ON	Hosting choice approved · GTM access
DELIVERABLES	Running sGTM container + monitoring
ACCEPTED WHEN	Events reach GA4, Ads and Meta via the server in test
THIRD-PARTY	sGTM hosting
IN FEE	INCLUDED
VARIABLE COST	Monthly by request volume
TIMING	Connect · W3

08 First-Party /gtgtag/ Proxy

OBJECTIVE	Serve tracking from goeldentalcare.com/gtgtag/ (first-party).
TASKS	• Cloudflare Worker routes /gtgtag/* → sGTM • Web GTM + GA4 loaded from /gtgtag/ • Fallback if the proxy fails
DEPENDS ON	07 · domain on Cloudflare
DELIVERABLES	Live proxy path + config in repo
ACCEPTED WHEN	All tag requests return 200 from /gtgtag/; site works if proxy is down
THIRD-PARTY	Cloudflare (Workers free tier)
IN FEE	INCLUDED
VARIABLE COST	Only above free limits
TIMING	Connect · W3

09 WhatsApp Business Cloud API

OBJECTIVE	Official API on the clinic's number, alongside the Business app.
TASKS	• Meta business verification + WhatsApp account • Number onboarding (coexistence) + display name • Webhook endpoint + secure token
DEPENDS ON	Business documents · number owner access CLIENT INPUT
DELIVERABLES	Verified WhatsApp account on the API
ACCEPTED WHEN	Test messages send and receive via API and app
THIRD-PARTY	Meta (no platform fee for Cloud API)
IN FEE	INCLUDED
VARIABLE COST	Per message (p. 47)
TIMING	Connect · W2–4

Steps 10–12.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

10 WhatsApp Automated Responses

OBJECTIVE	Reply to every enquiry within ~30 seconds, day or night.
TASKS	• Lead router (Worker): form/triage → WhatsApp • Templates: confirmation, fee range, doctor, location, booking link • Follow-ups, opt-out, human takeover, logging
DEPENDS ON	09 · templates approved by Meta · fee ranges CLIENT INPUT
DELIVERABLES	Live automation + message log
ACCEPTED WHEN	9 of 10 test leads get the first message within 30 s; STOP works
THIRD-PARTY	Meta templates
IN FEE	INCLUDED
VARIABLE COST	Per template message
TIMING	Connect · W4

11 AI Smile Estimator / Triage

OBJECTIVE	45-second guided assistant that qualifies intent and hands off.
TASKS	• Flow build in Voiceflow (or Landbot) • Guardrails: no diagnosis, no advice • Handoff to WhatsApp / call / booking + events
DEPENDS ON	Fee ranges + approved wording CLIENT INPUT
DELIVERABLES	Live assistant on treatment pages
ACCEPTED WHEN	All test scripts pass; medical questions get the safe reply
THIRD-PARTY	Voiceflow or Landbot subscription
IN FEE	INCLUDED
VARIABLE COST	Monthly + usage credits
TIMING	Connect · W4–5

12 Appointment Booking

OBJECTIVE	A booking request that reaches staff in under a minute.
TASKS	• Request form: treatment group, preferred day/time, contact • Staff alert + WhatsApp confirmation • Status: requested → confirmed → attended
DEPENDS ON	10 · staff workflow agreed
DELIVERABLES	Booking flow + staff alert
ACCEPTED WHEN	Request reaches staff < 1 min with its reference code
THIRD-PARTY	Optional scheduler if the clinic wants live slots
IN FEE	INCLUDED
VARIABLE COST	Only if a scheduler is chosen
TIMING	Connect · W4

Steps 13–15.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

13 Forms + Consent

OBJECTIVE	Collect only what is needed, with clear consent.
TASKS	• Unticked consent: contact + WhatsApp opt-in • No symptom fields; spam protection • Consent stored with time and wording version
DEPENDS ON	Privacy wording reviewed CLIENT INPUT
DELIVERABLES	Forms with consent records
ACCEPTED WHEN	Consent saved for every submission; no health data to analytics
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Connect · W4

14 Web GTM

OBJECTIVE	One clean container, built from a written spec.
TASKS	• Rebuild container; remove dead tags • Consent Mode v2 + data layer spec • Triggers for all 14 events
DEPENDS ON	08 · 19
DELIVERABLES	Published container + spec
ACCEPTED WHEN	Every event fires once in preview; no orphan tags
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Measure · W4

15 GA4

OBJECTIVE	Reliable analytics without patient data.
TASKS	• Key events, custom dimensions (ref, page type, location) • Internal-traffic filter, 14-month retention • Links: Google Ads, Search Console
DEPENDS ON	14
DELIVERABLES	Configured GA4 property
ACCEPTED WHEN	Real-time shows all events; key events marked
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Measure · W4–5

Steps 16–18.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

16 Google Ads Conversion Tracking

OBJECTIVE	Bid on real enquiries and real appointments.
TASKS	• Replace the 19 dead actions with 5 clean ones • Enhanced conversions for leads (consented, hashed) • Offline import: booking confirmed / attended
DEPENDS ON	15 · 20
DELIVERABLES	Conversion actions + import routine
ACCEPTED WHEN	Test conversions recorded; primary vs secondary set
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	Ad spend paid by clinic
TIMING	Measure · W5

17 Meta Pixel

OBJECTIVE	Browser-side Meta events behind consent.
TASKS	• Pixel via GTM (not a plugin) • Contact, Lead, Schedule events • Consent gating
DEPENDS ON	Meta Business access
DELIVERABLES	Pixel live
ACCEPTED WHEN	Events Manager shows browser events after consent only
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Measure · W5

18 Meta Conversions API

OBJECTIVE	Server copy of each event, deduplicated.
TASKS	• Meta CAPI tag in sGTM • Shared event_id browser ↔ server • Restricted-data check on the ad account
DEPENDS ON	07 · 17
DELIVERABLES	CAPI live + dedup report
ACCEPTED WHEN	Events show as deduplicated; no health parameters sent
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Measure · W5

Steps 19–21.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

19 Unified Event Tracking Matrix

OBJECTIVE	One spec for every event, platform and consent rule.
TASKS	• 14 events (p. 32) • Parameters + never-send list • Audit: spec = build
DEPENDS ON	14–18
DELIVERABLES	Tracking spec sheet
ACCEPTED WHEN	Audit finds zero gaps between spec and build
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Measure · W4–5

20 Reference Code + Attribution

OBJECTIVE	Trace a patient from first click to appointment.
TASKS	• GD-XXXXX code on WhatsApp, call, form, triage • First + last touch: UTM, gclid, fbclid • Lead log with status updates by staff
DEPENDS ON	10 · 12 · 13
DELIVERABLES	Lead log + attribution report
ACCEPTED WHEN	10 test leads traced end to end
THIRD-PARTY	Google Sheets / Workers D1 (free tier)
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Measure · W5

21 Search Console + Technical SEO

OBJECTIVE	A clean, crawlable site with no lost history.
TASKS	• 301 map for all 96 legacy .html URLs • Remove test/sample/payment pages from index • Sitemap, robots, canonicals, 404 monitoring
DEPENDS ON	03
DELIVERABLES	Redirect map + crawl report
ACCEPTED WHEN	96 of 96 old URLs return 301 to the right page
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Discover · W5–6

Steps 22–24.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

22 AEO / GEO Answer Blocks

OBJECTIVE	Clear, quotable answers on every key page.
TASKS	• ≥ 5 answer blocks per treatment, doctor, location page • Question → direct answer → context • Dentist review of every medical answer
DEPENDS ON	Doctor approval · fee ranges CLIENT INPUT
DELIVERABLES	Approved answer library
ACCEPTED WHEN	Every core page has approved blocks + FAQ schema
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Discover · W5–7

23 Structured Data / Schema

OBJECTIVE	Machine-readable clinic, doctors, procedures, FAQs.
TASKS	• Dentist, Person, MedicalProcedure, FAQPage, Breadcrumb, VideoObject • One entity graph with stable @ids • No self-serving review markup
DEPENDS ON	22 · 26
DELIVERABLES	Schema templates
ACCEPTED WHEN	Rich Results Test: 0 errors on every template
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Discover · W6

24 Google Business Profile

OBJECTIVE	Maps listing complete, consistent and tracked.
TASKS	• Categories, services, hours, photos • UTM-tagged website + booking links • Review request + reply process
DEPENDS ON	GBP owner access
DELIVERABLES	Optimised profile(s)
ACCEPTED WHEN	Profile matches site NAP exactly; UTM link live
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Discover · W6

Steps 25–27.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

25 Apple Business Connect

OBJECTIVE	Correct place card in Apple Maps for iPhone users.
TASKS	• Claim + verify • Hours, photos, website, call action • Match GBP details
DEPENDS ON	Apple ID for the clinic
DELIVERABLES	Verified Apple place card
ACCEPTED WHEN	Place card shows correct details
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Discover · W6

26 Malviya Nagar / Saket / Kalkaji Local Hubs

OBJECTIVE	Three genuinely local pages, no doorway copies.
TASKS	• Malviya Nagar location page • Saket hub (one metro stop away) • Kalkaji: branch page or patient hub CLIENT INPUT
DEPENDS ON	Kalkaji status · local photos/reviews CLIENT INPUT
DELIVERABLES	3 published local pages
ACCEPTED WHEN	Each page ≥ 60% unique content + own FAQs
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Discover · W6–7

27 Before / After Sliders

OBJECTIVE	Real, consented results shown accessibly.
TASKS	• Case post type + slider block (≈3 KB JS) • Consent ID, date, scope per case • Image pipeline: crop, compress, lazy-load
DEPENDS ON	Consented cases CLIENT INPUT
DELIVERABLES	Case library + slider
ACCEPTED WHEN	Keyboard + touch work; every case has a consent record
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Prove · W6–7

Steps 28–30.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

28 Global Dental Brand Showcase

OBJECTIVE	Show the materials and systems actually used.
TASKS	• Brand grid: Straumann, Nobel Biocare, Invisalign, 3M Lava • Logos only where permitted; text otherwise • No endorsement wording
DEPENDS ON	Proof of use + logo permission CLIENT INPUT
DELIVERABLES	Brand showcase block
ACCEPTED WHEN	Each brand has proof of use on file
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Prove · W7

29 Performance / Core Web Vitals

OBJECTIVE	Fast on a mid-range phone on mobile data.
TASKS	• Budget enforcement (p. 37) • Image pipeline, caching, script deferral • Facades for video, chat, AI widget
DEPENDS ON	03 · 07 · 11
DELIVERABLES	Performance report
ACCEPTED WHEN	Key templates meet lab targets on staging
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Build · W7–8

30 Privacy / DPDP Controls

OBJECTIVE	Patient data separated, consented and minimised.
TASKS	• Data map, privacy notice, AI disclosure • Access controls, retention, processor list • Consent banner + Consent Mode
DEPENDS ON	Clinic legal / compliance review CLIENT INPUT
DELIVERABLES	Privacy pack
ACCEPTED WHEN	Notice published after the clinic's review
THIRD-PARTY	Consent banner (free tier possible)
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Build · W7–8

Steps 31–33.

QUESTION THIS PAGE ANSWERS

Objective, tasks, dependencies, deliverables, acceptance and cost for each step

31 QA + Deployment

OBJECTIVE	Nothing goes live untested.
TASKS	• QA checklist (p. 43–44) + client UAT • DNS cutover in a low-traffic window • Rollback ready
DEPENDS ON	All previous steps
DELIVERABLES	QA report + go-live
ACCEPTED WHEN	QA gate passed; client UAT sign-off
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Launch · W8

32 Launch + 30-Day Monitoring

OBJECTIVE	Catch problems in the first month.
TASKS	• Day 1 / 3 / 7 / 14 / 30 checks • Fixes for issues found • 30-day report
DEPENDS ON	31
DELIVERABLES	30-day report
ACCEPTED WHEN	All P1 issues closed; tracking stable
THIRD-PARTY	None
IN FEE	INCLUDED
VARIABLE COST	None
TIMING	Launch · W9–13

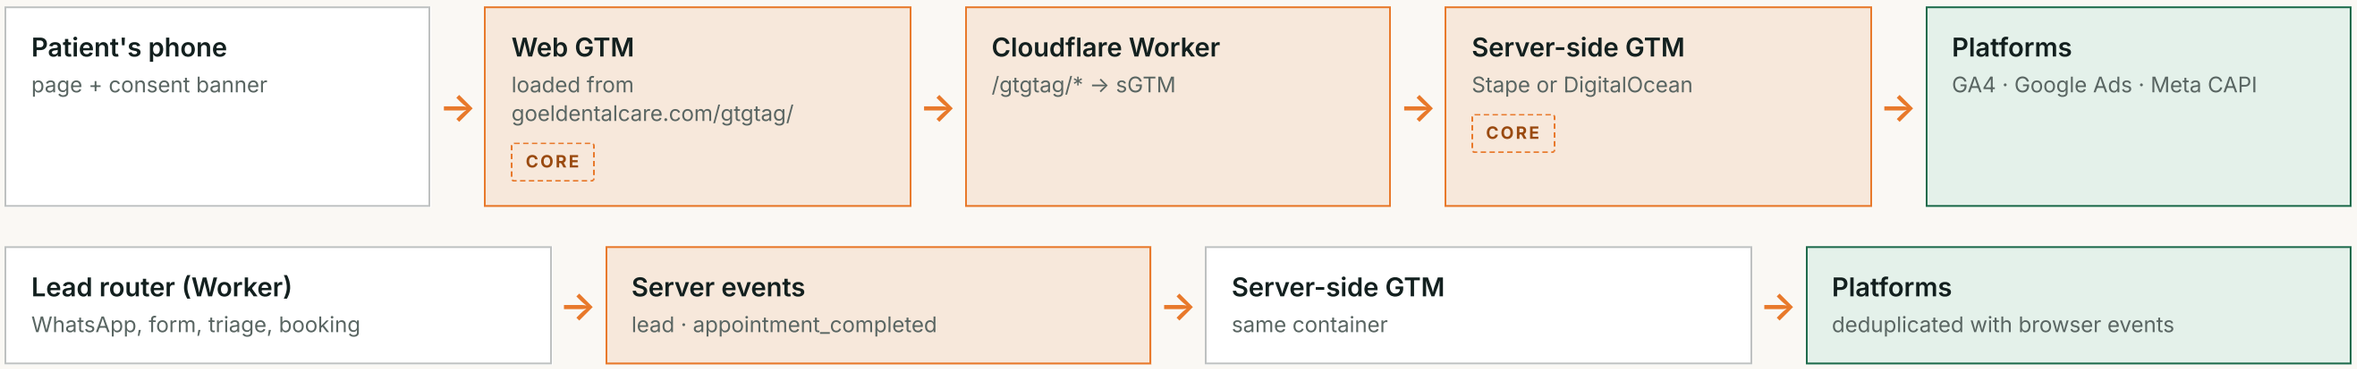

33 Ongoing Optimisation

OBJECTIVE	Improve campaigns, content and conversion month by month.
TASKS	• Ads management, CRO, content, reporting
DEPENDS ON	32
DELIVERABLES	Monthly plan + report
ACCEPTED WHEN	Agreed separately
THIRD-PARTY	Ad spend + tools
IN FEE	NOT INCLUDED separate engagement
VARIABLE COST	Monthly fee if agreed
TIMING	Grow · After W13

Tags run on the clinic's server, served from its own domain.

QUESTION THIS PAGE ANSWERS

How does server-side tracking work?

Why it helps

- ✓ Cookies set by the clinic's own domain last longer than third-party cookies in Safari
- ✓ Fewer requests blocked by ad blockers
- ✓ One place to strip or hash data before it leaves
- ✓ Lighter page: Meta and Ads code moves off the phone

What it does not do

- × Bypass consent: if a patient declines, nothing is sent
- × Bypass Apple's privacy rules (ITP, link tracking protection)
- × Recover 100% of signals; it improves the share, it does not complete it
- × Replace the need for offline appointment data

DNS / domain

- ✓ Domain DNS moved to Cloudflare (free plan)
- ✓ Path /gtgtag/ on the main domain = first-party, same-origin
- ✓ Fallback: subdomain sst.goeldentalcare.com (CNAME to sGTM) if the proxy path is not possible
- ✓ SSL on both via Cloudflare

Seven steps, two hosting options.

QUESTION THIS PAGE ANSWERS

How is it built, and what does it cost to run?

01	**Provision sGTM**	Stape (managed) or Docker image on DigitalOcean
02	**Domain on Cloudflare**	nameservers moved; DNS records copied 1:1
03	**Worker for /gtgtag/**	proxies gtm.js, gtag and /collect to sGTM; passes client IP + user agent
04	**Web GTM rewired**	transport URL = goeldentalcare.com/gtgtag
05	**Clients + tags in sGTM**	GA4 client → GA4, Google Ads, Meta CAPI tags
06	**Consent passed through**	Consent Mode signals respected server-side
07	**Monitor**	uptime check + weekly request volume

EVENT ROUTING	GA4	GOOGLE ADS	META CAPI
page_view / service_view	✓	—	PageView only
phone / WhatsApp click	✓	✓ conversion	Contact
form_submit · booking_complete	✓	✓ conversion	Lead · Schedule
lead (server)	✓	Enhanced conv.	Lead
appointment_completed (offline)	optional	Offline import	server event

HOSTING OPTION	PLANNING COST	
Stape Pro (managed, 500K requests)	$20/mo list · $17/mo annual	ESTIMATE
DigitalOcean droplet (self-managed)	Vendor droplet price; we maintain updates	ESTIMATE
Cloudflare Worker for /gtgtag/	Free tier; paid plan only above limits	USAGE-BASED

RECOMMENDED

Recommendation

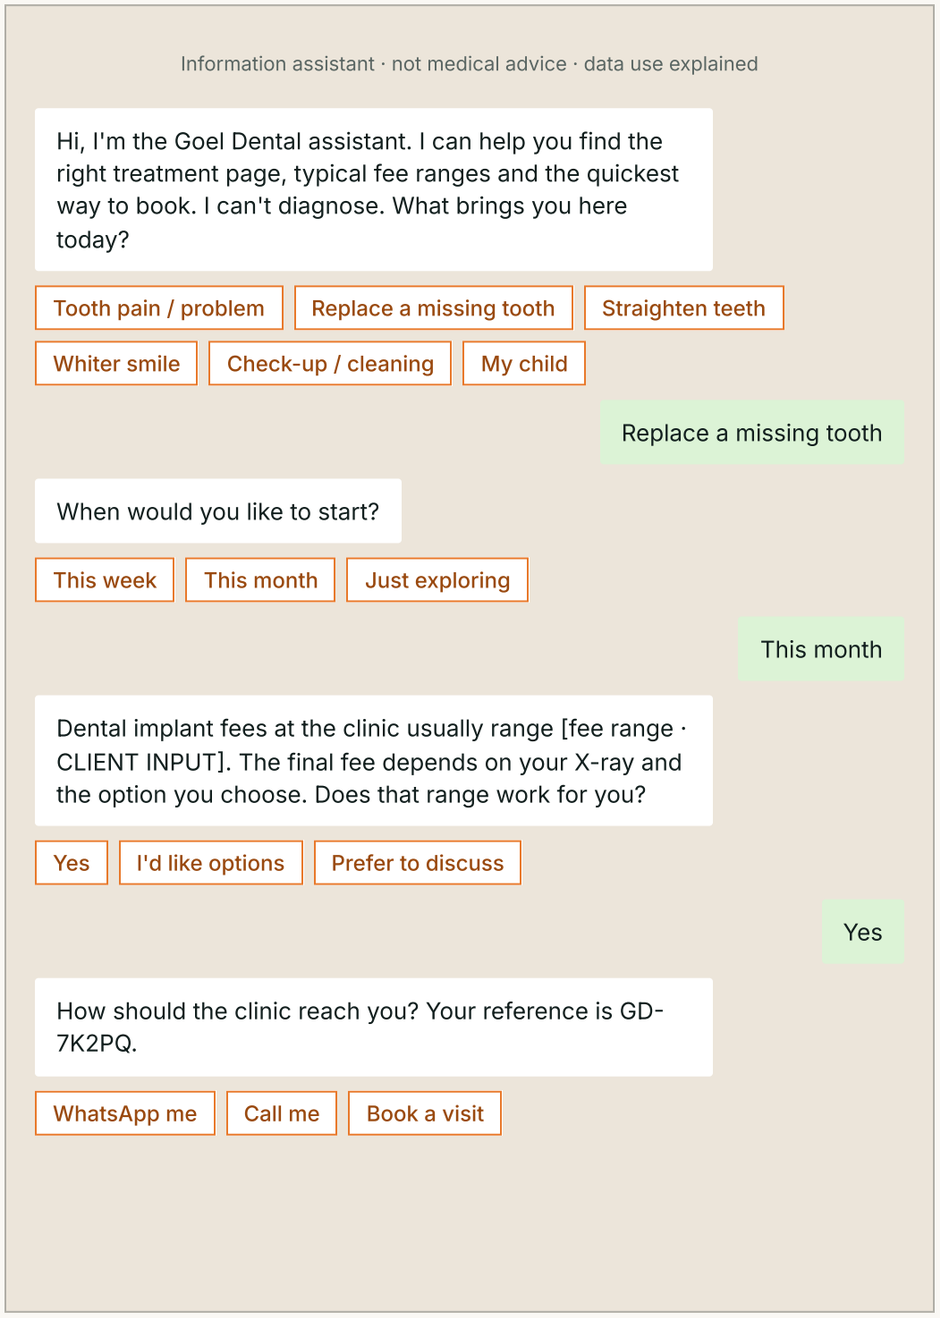

Stape Pro: managed uptime, built-in Meta CAPI support, low running cost. DigitalOcean if the clinic prefers its own server. Either way, the clinic owns the account.

Stape prices from stape.io/price, Nov 2026. Infrastructure is billed to the clinic, separate from the implementation fee.

About 45 seconds, five taps, one clear handoff.

QUESTION THIS PAGE ANSWERS

What does the patient experience?

01	**Open**	on treatment pages, after 10 s or on tap · ai_triage_open
02	**Disclosure**	assistant, not a dentist; what is stored
03	**Intent**	6 buttons; free text optional
04	**Urgency**	today · this week · this month · exploring
05	**Fee range**	clinic-approved range shown as text
06	**Contact + consent**	WhatsApp / call / book; opt-in unticked
07	**Handoff**	ref code carried · ai_triage_handoff

Safety reply (fixed text)

For pain with swelling, fever, bleeding that won't stop or difficulty breathing or swallowing, the assistant shows the clinic phone number and advises seeking urgent medical care. It never suggests a cause or treatment.

Buttons first, AI only to understand free text.

QUESTION THIS PAGE ANSWERS

How does it decide, hand off and stay safe?

INTENT	URGENCY	PRIORITY	HANDOFF
Tooth pain / problem	Today / this week	High	Call now + WhatsApp; staff alert
Missing tooth · straighten teeth	This month + range OK	High	WhatsApp with fee range + booking link
Whiter smile · cosmetic	This month	Medium	WhatsApp + cosmetic page
Check-up · child	Any	Medium	Booking request
Any	Just exploring	Low	Answer page + optional WhatsApp
Medical question typed	—	Safe reply	"A dentist needs to examine you" + contact options

EVENT	WHEN	SENT TO
ai_triage_open	assistant opened	GA4
ai_triage_complete	last question answered	GA4 · Ads (secondary)
ai_triage_handoff	WhatsApp / call / book chosen	GA4 · Ads · Meta (Contact)
ai_triage_abandon	closed before handoff	GA4 (last step only)

Guardrails

- System prompt limits the model to classifying intent and urgency
- No diagnosis, no treatment advice, no outcome claims
- Fixed, dentist-approved answers for fees and FAQs
- Transcripts kept minimal; no symptoms sent to analytics
- Clear label: "Information assistant, not a dentist"

Lead capture

Name, phone, intent group, urgency, preferred channel, consent flags, ref code. Saved to the lead log; staff alerted on High.

THIRD-PARTY

Platform + cost

Voiceflow (Pro seat ≈ $60/mo + usage credits) or Landbot (Starter $45/mo monthly; $36 annual). Embedded with a click-to-load facade so it adds no weight to first load.

Clinic provides

Approved fee ranges · approved wording · who receives High alerts CLIENT INPUT

QUESTION THIS PAGE ANSWERS

How do WhatsApp messages flow?

Two ways in, one log, a human always available.

A · Patient taps WhatsApp on the site

wa.me link
message pre-filled with ref GD-XXXXX

→

Clinic number
Cloud API + Business app (coexistence)
CORE

→

Webhook
lead router logs ref + source

→

Instant reply
fee range · Dr. Shikha · location · book

→

Staff
continue in the Business app

B · Patient submits a form or the AI assistant (with WhatsApp opt-in)

Form / assistant
consent + ref code

→

Lead router
validates, logs, alerts staff

→

Template message
sent within ~30 s
CORE

→

Follow-up
max 2, stops on reply / booking / STOP

→

Human takeover
any staff reply pauses automation

Free vs paid

Path A: replies within 24 h of the patient's message are free service messages. Path B starts with a template message, charged per message by Meta.

Logging

Every message event (sent, delivered, read, failed) stored against the ref code. Message content with health details stays in WhatsApp, not in the log.

Failure handling

If the API fails or a template is rejected: retry once, then email + WhatsApp alert to staff with the lead details. Daily check of failed sends.

What Meta requires, and what it costs to run.

QUESTION THIS PAGE ANSWERS

What is needed to go live?

REQUIREMENT	DETAIL	OWNER
Meta Business account	Business verification (registration / GST / utility documents)	Clinic CLIENT INPUT
WhatsApp Business account	Created inside the clinic's Meta Business account	Daniel
Phone number	Existing clinic number via coexistence: Business app keeps working	Clinic
Display name	"Goel Dental Care" reviewed by Meta	Meta
Webhook	HTTPS endpoint on the lead router, verified token, signature check	Daniel
Templates	Confirmation (utility) · fee + doctor + location (utility) · 2 follow-ups (marketing)	Meta approval
Opt-in	Unticked checkbox on forms and assistant; wording stored	Clinic review
Opt-out	STOP / "no more messages" → suppression list	Automatic
Privacy policy URL	Required by Meta; links to the clinic's notice	Clinic review

META CHARGE (INDIA)	PER MESSAGE
Marketing template	₹0.8631
Utility template	₹0.1150
Authentication	₹0.1150
Service reply in 24 h window	Free
Utility inside open window	Free

ESTIMATE

Example month

200 form leads × 1 utility template (₹23) + 2 follow-ups to 100 non-bookers (≈ ₹173) ≈ **₹196 + 18% GST**. Patients who message first cost nothing for 24 h.

Rates: Meta INR rate card effective 1 Oct 2026, as published by third-party providers; exclude GST. Meta changes rates quarterly; the clinic is billed directly by Meta.

Three disciplines, one set of pages.

QUESTION THIS PAGE ANSWERS

What is the difference between SEO, AEO and GEO?

	SEO	AEO	GEO
Goal	Rank pages in search results	Be the direct answer to a question	Be cited inside AI-written answers
Where	Google / Bing results	Featured snippets, People also ask, voice	Google AI Overviews, ChatGPT search, Perplexity, Gemini
What it needs	Crawlable pages, relevance, links, speed	Question headings + 40–60-word direct answers	Consistent facts, clear entities, sources worth quoting
Built here by	Templates, 301s, internal links, CWV	Answer blocks on every core page	Schema graph, doctor + clinic entities, plain-text fees and hours
Measured by	Search Console clicks + positions	Snippet / PAA appearances	Monthly check of 20 fixed AI questions

Answer block anatomy

Question — as patients ask it

↓

Direct answer — 40–60 words, first sentence answers

↓

Context — what changes it · when to see a dentist

↓

Source — reviewed by Dr. [name] · date

Rules

- ✓ Facts the clinic approves: fees, hours, doctors, address
- ✓ Same facts on site, GBP, Apple, schema and WhatsApp replies
- ✓ No superlatives ("best", "#1"), no guarantees
- ✓ Dentist review for every medical answer
- ✓ Updated date on every block

No ranking, AI citation or traffic outcome is promised. AI systems choose their own sources.

What the blocks look like on real pages.

QUESTION THIS PAGE ANSWERS
What does an answer block say?

TREATMENT

Is root canal treatment painful?

Root canal treatment is done under local anaesthetic, so most patients feel pressure rather than pain during the procedure. Mild soreness for a few days afterwards is common and usually settles with simple care. Your dentist will explain what to expect for your tooth before starting.

Reviewed by Dr. [name] CLIENT INPUT

FEES

How much does a root canal cost at Goel Dental?

[Fee range CLIENT INPUT]. The final fee depends on the tooth, the number of canals and whether a crown is needed. It is confirmed in writing after examination and X-ray, before treatment starts.

Source: clinic fee list, [date]

DOCTOR

Who is Dr. Shikha Goel?

Dr. Shikha Goel is a dentist at Goel Dental Care, Malviya Nagar. [Qualifications, registration and focus areas CLIENT INPUT]. She sees patients at [days/hours CLIENT INPUT].

Linked to Person schema

LOCATION

How do I reach Goel Dental from Saket?

Malviya Nagar metro station is one stop from Saket on the Yellow Line. The clinic is at [address, as on Google Business Profile] · [walking time from station, measured at build]. [Parking details CLIENT INPUT].

Same text on GBP + Apple

BOOKING

Can I book on WhatsApp?

Yes. Tap WhatsApp on any page; your message includes a reference code so the team can see your request. Replies are instant at any hour, and the front desk confirms the time during clinic hours.

Matches automation

SAFETY

What if I have severe swelling?

Swelling with fever, difficulty swallowing or breathing needs urgent medical attention. Call the clinic on [number] and, if symptoms are severe, go to the nearest emergency department.

Fixed text, dentist-approved

Draft wording for illustration. Every medical answer is reviewed and approved by the clinic's dentist before publishing; bracketed items need client input.

Three pages, three different jobs.

QUESTION THIS PAGE ANSWERS

How are Malviya Nagar, Saket and Kalkaji handled?

Home — brand + all treatments

↓

Malviya Nagar — /dentist-malviya-nagar/ · the clinic's own location page

↓

Saket — /dentist-near-saket/ · patients coming from Saket

↓

Kalkaji — /dentist-kalkaji/ (branch) or /dentist-near-kalkaji/ (patient hub)

↓

Treatment pages — each links back to the nearest hub

Anti-doorway rules

- ≥ 60% unique content per page
- Real local facts only: routes, metro, parking, times, local reviews with permission
- Each page answers a different question
- No swapped place names, no list of 20 suburbs
- One Dentist entity per real clinic location

01 Malviya Nagar · location page

SEARCH INTENT	dentist malviya nagar · dental clinic malviya nagar (local, high intent)
PURPOSE	Primary location page; matches the Business Profile
URL	/dentist-malviya-nagar/
H1	Dentist in Malviya Nagar · Goel Dental Care
SECTIONS	Address + map · hours · metro + parking · treatments here · doctors · reviews · local FAQs · book
INTERNAL LINKS	All treatment hubs, doctor pages, fees, Saket + Kalkaji hubs
LOCAL FAQS	Nearest metro? Parking? Open Sunday? CLIENT INPUT · Walk-ins?
TRUST	NABH badge · 4.8★ / 709 Google reviews (live count) · doctor credentials CLIENT INPUT
CTAS	Directions · WhatsApp · Call · Book (all with ref code)
SCHEMA	Dentist (address, geo, hours, phone, sameAs) + BreadcrumbList + FAQPage

Useful to someone travelling in, never a copy.

QUESTION THIS PAGE ANSWERS

What goes on the Saket and Kalkaji pages?

02 Saket · patient hub

SEARCH INTENT	dentist near saket · dental clinic saket (local, will travel a short distance)
PURPOSE	Show Saket residents how close the clinic is; no claim of a Saket clinic
URL	/dentist-near-saket/
H1	Dental care near Saket · one metro stop to Malviya Nagar
UNIQUE CONTENT	Route from Saket (Yellow Line, one stop) · drive time measured at build · what Saket patients most often book CLIENT INPUT · reviews from Saket patients with permission
LOCAL FAQS	How long from Saket? Parking? Evening slots? CLIENT INPUT
CTAS	Directions from Saket · WhatsApp · Book
SCHEMA	WebPage about the Malviya Nagar Dentist entity + areaServed: Saket (no second Dentist entity)

03 Kalkaji · branch page or patient hub

DECISION	Is there an active Goel clinic in Kalkaji? CLIENT INPUT The current site has /dentist-in-kalkaji.html and mentions Kalkaji in its description.
IF BRANCH	/dentist-kalkaji/ · full location page · own address, hours, doctors, Business Profile, Dentist schema with parentOrganization
IF NO BRANCH	/dentist-near-kalkaji/ · route: Kalkaji Mandir (Magenta Line) → Hauz Khas → Malviya Nagar (Yellow Line); WebPage + areaServed
H1	Dentist in Kalkaji · Goel Dental Care / Dental care near Kalkaji
UNIQUE CONTENT	CGHS information if offered CLIENT INPUT · branch-specific doctors and hours · local reviews with permission
CTAS	Directions · WhatsApp · Call · Book
ADS USE	Separate ad groups per hub, each landing on its own page

Browser event + server event + one ID = one conversion.

QUESTION THIS PAGE ANSWERS

How are Meta conversions tracked without double counting?

Browser event
Pixel via GTM · event_id = abc123

→

+ Server event
CAPI via sGTM · same event_id abc123
CORE

→

= One deduplicated conversion
Meta matches the IDs and keeps one

SITE EVENT	META EVENT	BROWSER	SERVER	NOTES
whatsapp_click	Contact	✓	✓	event_id shared
phone_click	Contact	✓	✓	
form_submit	Lead	✓	✓	hashed phone only with consent
booking_start	custom: BookingStart	✓	—	may be restricted for health accounts
booking_complete	Schedule	✓	✓	
ai_triage_open / complete	custom	✓	—	may be restricted
lead	Lead	—	✓	from lead router
high-intent lead	Lead + lead_quality=high	—	✓	no treatment named
appointment_completed	custom: Appointment	—	✓	offline status, no clinical data

Never sent to Meta

- × Treatment, symptoms, diagnosis, medical history
- × Free-text messages or assistant transcripts
- × Fee amounts tied to a person
- × Unhashed name, phone or email

Meta health restrictions

Meta classifies dental clinics as health & wellness and may restrict custom events, URL details or lower-funnel optimisation on the ad account. CAPI does not bypass this. Step 18 checks what the account allows before audiences are built.

Consent

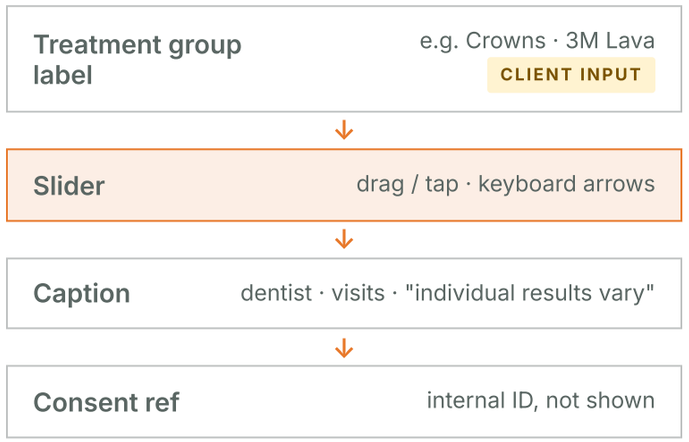

Pixel and CAPI fire only after ad consent. Without consent, no Meta event is sent from browser or server.

Real results, consented, accessible and light.

QUESTION THIS PAGE ANSWERS

How are before/after cases built?

Case card (UI)

Mobile

Full-width slider, 4:3 frame, drag or tap to toggle; no swipe conflict with page scroll.

AREA	IMPLEMENTATION
WordPress	Custom post type "Case" + ACF fields (before, after, treatment group, dentist, consent ID, consent date, scope, expiry) + one lightweight block
Performance	≈ 3 KB vanilla JS, no slider plugin · WebP/AVIF at 2 sizes · lazy-loaded below the fold · fixed aspect ratio (no layout shift)
Accessibility	Native range input with label, visible focus, arrow keys, alt text describing the change without identifying the person
Image handling	Same angle and lighting · crop to the mouth where possible · strip EXIF/location data
Consent	Written consent per case: website use (social and ads asked separately) · withdrawal removes the case within 7 days · guardian consent for minors
Ads	Not used in Meta ads (Meta does not allow before/after in health ads); website only unless a platform permits it
Professional rules	Clinic confirms use with its advisor under dental advertising rules CLIENT INPUT

Materials actually used, shown honestly.

QUESTION THIS PAGE ANSWERS

How are brands shown without implying endorsement?

BRAND	SHOWN AS	EVIDENCE NEEDED	STATUS
3M Lava (crowns)	Product name + how used	Already listed on the current site	VERIFIED on site
Straumann (implants)	Name; logo if guidelines allow	Invoice / supplier confirmation	CLIENT INPUT
Nobel Biocare (implants)	Name; logo if guidelines allow	Invoice / supplier confirmation	CLIENT INPUT
Invisalign (aligners)	Name; logo only for certified providers	Provider status (Invisalign doctor locator)	CLIENT INPUT

Disclaimer under the grid

"Brand names are trademarks of their respective owners. Listed products are used at Goel Dental Care; listing does not imply endorsement, sponsorship or partnership."

UI

- "Materials & systems we use" grid, 4 tiles
- Each tile: name · product · one line on where it is used
- Links to the relevant treatment page
- No carousel

Build

- Inline SVG logos < 2 KB each, or text tiles
- Grayscale until hover; no layout shift
- ACF repeater so the clinic can edit the list

Not shown

- Brands not used at the clinic
- "Official partner" or "certified" wording without proof
- Logos copied from the brand's site without permission

14 events, one spec.

QUESTION THIS PAGE ANSWERS

What is tracked, where, and under which consent?

EVENT	TRIGGER	PLATFORMS	PARAMETERS	CONSENT	BROWSER	SERVER	CONVERSION	PURPOSE
service_view	Treatment page view	GA4	page_type, service_group, location_id	Analytics	✓	—	No	Content demand
faq_open	Answer block expanded	GA4	question_id	Analytics	✓	—	No	Content gaps
directions_click	Directions / map tap	GA4 · Ads	location_id, cta_position	Analytics + ads	✓	✓	Secondary	Visit intent
phone_click	tel: link	GA4 · Ads · Meta	ref_id, location_id, cta_position	Analytics + ads	✓	✓	Primary	Enquiry
whatsapp_click	wa.me link	GA4 · Ads · Meta	ref_id, cta_position	Analytics + ads	✓	✓	Primary	Enquiry
form_submit	Valid form sent	GA4 · Ads · Meta	ref_id, form_id	Analytics + ads	✓	✓	Primary	Enquiry
booking_start	Booking form opened	GA4 · Meta	ref_id	Analytics + ads	✓	—	No	Funnel drop-off
booking_complete	Booking request sent	GA4 · Ads · Meta	ref_id, slot_part (am/pm)	Analytics + ads	✓	✓	Primary	Appointment intent
ai_triage_open	Assistant opened	GA4	page_type	Analytics	✓	—	No	Assistant reach
ai_triage_complete	All questions answered	GA4 · Ads	intent_group, urgency, priority	Analytics + ads	✓	—	Secondary	Qualification
ai_triage_handoff	Channel chosen	GA4 · Ads · Meta	ref_id, channel	Analytics + ads	✓	✓	Secondary	Assistant → enquiry
ai_triage_abandon	Closed before handoff	GA4	last_step	Analytics	✓	—	No	Fix the flow
lead	Lead router logs a valid lead	GA4 · Ads · Meta	ref_id, channel, lead_quality	Recorded consent	—	✓	Primary	One lead = one record
appointment_completed	Staff marks attended	Ads (offline) · Meta · GA4	ref_id / gclid, status	Recorded consent	—	✓	Primary (offline)	Bid on real patients

service_group and intent_group are broad categories (e.g. "implants"), sent to GA4 only for content reporting, never to Meta. Google Ads receives conversions, not treatment names.

What is never sent, and how consent controls the rest.

QUESTION THIS PAGE ANSWERS

How is patient privacy protected in analytics?

Never sent to GA4, Google Ads, Meta or any marketing tool

- ✕ Symptoms, diagnosis, treatment plans, medical history
- ✕ Free-text from forms, chat or WhatsApp
- ✕ Names, phone numbers or emails in plain text
- ✕ Fees quoted to a specific person
- ✕ Before/after case identity

Consent Mode v2 mapping

BANNER CHOICE	SIGNAL	EFFECT
Analytics	analytics_storage	GA4 cookies
Ads	ad_storage	Ads + Meta cookies
Ads data	ad_user_data	hashed contact for enhanced conv.
Personalisation	ad_personalization	remarketing lists

Identifiers used instead

- ✓ Reference code GD-XXXXX (random, no meaning)
- ✓ GA4 client ID (first-party cookie)
- ✓ gclid / fbclid from the ad click
- ✓ Hashed phone, only with ads consent, only server-side
- ✓ Lead quality as a label (high / medium / low)

From first click to attended appointment.

QUESTION THIS PAGE ANSWERS

How is a patient traced back to the campaign?

LEAD LOG FIELD	EXAMPLE	WHO SEES IT
ref_id	GD-7K2PQ	Staff, Daniel
first / last source	google / cpc / root-canal-mn	Staff, Daniel
click IDs	gclid, fbclid	System only
channel	whatsapp	Staff, Daniel
intent group	implants	Staff only
status	new → contacted → booked → attended	Staff
consent flags + version	contact ✓ · whatsapp ✓ · v1.2	Staff, Daniel

Calls

Phone calls cannot carry a code automatically. Staff ask "Do you have a reference?" or note the source; optional call-tracking numbers can be added later.

What it answers

Which channel → campaign → page → enquiry → appointment. Revenue per patient stays in the clinic's own records; only status (attended) goes back to ad platforms.

Example ID

Ref GD-7K2PQ is an example of the format only.

Hubs, not volume. Every old URL redirected.

QUESTION THIS PAGE ANSWERS

How is the site structured for search?

SECTION	URL PATTERN
Home	/
Treatments hub	/treatments/
Treatment (×8–10)	/treatments/root-canal-treatment/ …
Doctors	/doctors/dr-shikha-goel/ …
Local hubs	/dentist-malviya-nagar/ · /dentist-near-saket/ · Kalkaji
Fees	/fees/
FAQ hub	/faq/
Cases	/before-after/
Book	/book/
Contact	/contact/
Blog (few, question-led)	/blog/…
Legal	/privacy/ · /terms/ · /ai-assistant/

Page rules

- Title: Treatment in Malviya Nagar | Goel Dental Care (≤ 60 chars)
- One H1 per page; H2s are patient questions
- Meta description written per page, ≤ 155 chars
- Lowercase slugs, no .html, no dates
- Every image has descriptive alt text
- Each treatment links to 2 related treatments, its doctor, fees and nearest hub

CORE

301 map · 96 legacy URLs

- Each old URL mapped to its closest new page (spreadsheet in repo)
- Duplicates (e.g. microscopic / single-sitting RCT) → one root canal hub
- Test, sample and payment pages → 410 Gone
- Thank-you pages → noindex
- Verified with a crawl: 96 of 96 resolve in one hop

Cosmetic pages

Whitening and veneers stay on this site or move to Delhi Dental Smiles CLIENT DECISION

One entity graph the machines can follow.

QUESTION THIS PAGE ANSWERS

Which structured data is used, and how is it linked?

Organization / Dentist · #clinic-mn — name, address, geo, hours, phone, sameAs: GBP, Apple, YouTube, Instagram

↓

Dentist · #clinic-kalkaji — only if a real branch · parentOrganization → #clinic-mn

↓

Person · #dr-shikha-goel — worksFor → #clinic-mn · credentials — CLIENT INPUT

↓

MedicalProcedure — one per treatment page · performer → Person

↓

FAQPage — answer blocks on the page

↓

WebPage + BreadcrumbList — about → entity · breadcrumbs

↓

VideoObject — clinic visit film

TEMPLATE	SCHEMA TYPES
Home	Dentist, WebSite, WebPage
Treatment	MedicalProcedure, FAQPage, BreadcrumbList
Doctor	Person (Physician details), BreadcrumbList
Malviya Nagar	Dentist, FAQPage, BreadcrumbList
Saket / Kalkaji hub	WebPage (about #clinic-mn, areaServed), FAQPage
Fees / FAQ	FAQPage, BreadcrumbList
Home video	VideoObject

Rules

- ✓ Stable @id URLs so every page points to the same entities
- ✓ Values match visible page text exactly
- ✓ No self-serving review or rating markup (not eligible for rich results)
- ✓ Validated with the Rich Results Test before launch

Engineering targets for a mid-range phone on mobile data.

QUESTION THIS PAGE ANSWERS

How fast will it be, and how is that protected?

METRIC / RESOURCE	TARGET	HOW IT IS HELD
LCP (largest content)	≤ 2.5 s (field, 75th percentile mobile)	Hero image ≤ 150 KB, preloaded; no video before load
INP (responsiveness)	≤ 200 ms	Little JS; no page builder; long tasks split
CLS (layout shift)	≤ 0.1	Fixed aspect ratios, reserved space for banners and widgets
JavaScript (first party)	≤ 120 KB compressed per page	Vanilla JS; per-template loading
CSS	≤ 60 KB compressed; critical CSS inline	One stylesheet, unused CSS removed
Images	≤ 150 KB above the fold; WebP/AVIF; lazy below	Upload pipeline resizes and compresses
Fonts	≤ 2 families, ≤ 4 WOFF2 files, self-hosted, swap	Subset to Latin
Third-party scripts at load	1: GTM (from /gtgtag/)	Meta + Ads moved server-side
Deferred third parties	AI assistant, YouTube, maps: click-to-load	Facades
Active plugins	≤ 15	Approval gate (p. 40)
Tracking scripts in browser	GTM only; Pixel loads after consent	sGTM does the rest

Starting point

Today: PageSpeed 25, LCP 18.6 s. A local competitor's WordPress site scores 94 (LCP 2.7 s), so the targets are realistic for this stack.

Not a guarantee

These are engineering targets. Real-user results depend on hosting, content added later and third-party scripts. No PageSpeed score is promised.

Checked

Lab tests on staging per template before launch; real-user Core Web Vitals in Search Console after 28 days.

Every layer, and the decision behind it.

QUESTION THIS PAGE ANSWERS
What is the technology stack?

LAYER	IMPLEMENTATION	WHY
WordPress	Latest stable, lightweight base theme + custom child theme, block editor, ACF for structured content	Easy editing without page-builder weight
Hosting	Managed WordPress (LiteSpeed or Nginx, PHP 8.2+, server cache, daily backups, staging)	Speed + support; clinic owns the account
CDN + DNS + SSL	Cloudflare free plan: DNS, CDN, SSL, WAF basics, Workers	Fast in India; hosts /gtgtag/ and the lead router
Caching	Host page cache + browser cache + Cloudflare edge for static files	One cache layer per job; no conflicts
Images	Resize on upload, WebP/AVIF, srcset, lazy-load, CDN delivery	Biggest speed win
JavaScript / CSS	Hand-written, per-template, no jQuery dependency where avoidable	Meets the budget
Database	Revisions limited, transients cleaned, weekly optimisation	Stays small
Security	2FA for admins, least-privilege roles, WAF, login rate limit, auto minor updates, file editing off	Health data nearby means higher bar
Backups	Daily host backups (14 days) + weekly off-site copy; restore tested	Recoverable in hours
Staging	Password-protected, noindex, same stack	Nothing tested on the live site
GitHub + deploy	Theme, custom plugins, Worker code in Git; deploy by pipeline or SFTP from tagged releases	Every change reversible
Cloud server	sGTM (Stape or DigitalOcean) · Cloudflare Workers + D1 for lead router and log	Low cost, clinic-owned
Appointment system	Booking request + staff confirmation; scheduler software only if the clinic chooses	Works with the front desk's process

The order that avoids rework.

QUESTION THIS PAGE ANSWERS

In what order is everything built?

WEEK 1–2 · FOUNDATION

01	Access + baseline
02	Hosting, staging, Cloudflare DNS
03	Git repo + deploy
04	Meta verification started
05	Sitemap + templates signed off

WEEK 2–5 · BUILD + CONNECT

01	Theme + templates
02	sGTM + /gtgtag/ proxy
03	WhatsApp API + webhook
04	Lead router + log
05	Forms, booking, AI assistant

WEEK 4–7 · MEASURE + CONTENT

01	Web GTM + Consent Mode
02	GA4, Ads, Pixel, CAPI
03	Answer blocks + schema
04	Local hubs, cases, brands
05	GBP + Apple

WEEK 7–9 · SHIP

01	301 map + crawl
02	Performance pass
03	Privacy pack review
04	QA gate + UAT
05	Cutover + monitoring

Meta business verification and template approval are started in week 1 because Meta's review time is outside our control.

No plugin because it is convenient.

QUESTION THIS PAGE ANSWERS

Which plugins are allowed, and how is a new one approved?

CATEGORY	PURPOSE	RISK / SPEED	REQUIRED	DECISION RULE
SEO (one)	Titles, sitemap, redirects	Low	Yes	Rank Math or Yoast, not both
Custom fields	Treatments, doctors, cases, FAQs	Low	Yes	ACF; no front-end JS
Forms	Consent, webhook to lead router	Medium	Yes	Must support consent + webhooks
Cache (one)	Page cache, minify	Medium	Yes	Host's own cache first
Images	Compression, WebP/AVIF	Low	Yes	Host/CDN first; plugin if missing
Backups	Off-site copy	Low	Yes	Host + one off-site tool
SMTP	Reliable email alerts	Low	Yes	One mailer
Consent banner	Consent Mode v2	Medium	Yes	Lightweight, Consent Mode certified
Security	Login, firewall	Medium	If host lacks	Host WAF + Cloudflare first
Page builders	Drag-and-drop layouts	High weight	No	Templates are code
Slider / WhatsApp / chat widgets	UI widgets	High weight	No	Custom components
Tracking plugins (Pixel, Site Kit)	Tags	Duplicates	No	All tracking via GTM

Plugin approval gate

01 **Need** — written problem it solves

↓

02 **Native first** — can theme, GTM or host do it?

↓

03 **Weight** — ≤ 30 KB front-end; no render-blocking

↓

04 **Health** — updated in last 6 months; active installs

↓

05 **Data** — does it send data out? privacy check

↓

06 **Test** — staging speed test before/after

↓

07 **Register** — owner, purpose, removal plan

QUESTION THIS PAGE ANSWERS

Where does each kind of data live?

Patient data and marketing data never share a system.

Marketing data

- Anonymous events, page views
- Campaign source, click IDs
- Ref code, lead quality label
- Lives in: GA4, Google Ads, Meta, sGTM

Enquiry data (personal)

- Name, phone, consent flags, channel
- Intent group, preferred time, status
- Lives in: lead log (access-controlled), WhatsApp
- Visible to: front desk, doctors, Daniel (setup/support)

Clinical records

- Diagnosis, treatment, X-rays, notes
- Lives in: the clinic's own records system only
- Never on the website, lead log or marketing tools

CONTROL	HOW
Data minimisation	Forms ask only what is needed to call back; no symptom fields
Access controls	Named accounts, 2FA, least privilege; staff removed on exit
Processors	Hosting, Cloudflare, Stape/DigitalOcean, Google, Meta, Voiceflow/Landbot, Google Workspace · listed in the privacy notice
Retention	Unconverted enquiries anonymised after a period the clinic sets (suggested 12 months) CLIENT INPUT
Security	HTTPS everywhere, encrypted tokens, signed webhooks, audit log of exports

Every consent recorded, every assistant labelled.

QUESTION THIS PAGE ANSWERS

Which consents and notices are needed?

POINT	CONSENT / NOTICE	RECORD KEPT
Website visit	Cookie / analytics banner: analytics and ads choices separate; reject as easy as accept	Consent state + version
Contact form · booking	Purpose notice + unticked contact consent	Timestamp, wording version, ref code
WhatsApp updates	Separate unticked opt-in; STOP to opt out	Opt-in + opt-out events
AI assistant	"Information assistant, not a dentist" + link to /ai-assistant/ explaining data use	Disclosure version shown
Before/after photos	Written consent per case: scope, withdrawal, minors via guardian	Signed form ID in the case record
Privacy notice	DPDP Act 2023: purposes, data, processors, retention, rights, grievance contact CLIENT INPUT	Published version + date
Data requests	Access, correction, erasure handled by the clinic within its stated timeline	Request log

Not legal advice. This section describes the technical controls that will be built. The privacy notice, consent wording and retention periods must be reviewed and approved by the clinic's legal or compliance advisor before launch.

Conversions, automation and data.

QUESTION THIS PAGE ANSWERS

What is tested before launch?

AREA	CHECK	ACCEPTANCE
Functional	All links, CTAs, menus and search work	0 broken links in crawl
Forms	Validation, consent saved, spam blocked, staff alert	10/10 test submissions logged with consent
Booking	Request → staff alert → WhatsApp confirmation	Alert < 1 min; ref code present
WhatsApp	Path A + B, follow-ups, STOP, human takeover, failure alert	9/10 first replies < 30 s; STOP honoured
AI assistant	All intents, safety reply, handoffs, events	All test scripts pass; no medical advice given
Tracking	14 events fire once with correct parameters	GA4 DebugView + sGTM preview match spec
Analytics	Key events, conversions, offline import test	Test conversions visible in GA4, Ads, Meta
Consent	Reject blocks ads + analytics tags	No ads/analytics hits after reject
Privacy	No health data in any payload	Payload audit: 0 sensitive fields
Redirects	96 legacy URLs	96/96 → 301 → correct 200 page

Search, proof, devices and security.

QUESTION THIS PAGE ANSWERS

What else must pass?

AREA	CHECK	ACCEPTANCE
Technical	HTTPS, canonicals, robots, sitemap, 404 page	Crawl clean; sitemap valid
SEO	Titles, H1s, meta, alt text, internal links	100% of pages pass checklist
Schema	Every template	Rich Results Test: 0 errors
Local SEO	NAP identical on site, GBP, Apple, schema	Exact match
AEO / GEO	Answer blocks approved + dated	≥ 5 per core page, all approved
Before / after	Consent IDs, keyboard, touch, lazy-load	Every case has a consent record
Brand showcase	Proof of use + permission on file	Every tile backed
Mobile + desktop	Android Chrome, iPhone Safari, desktop Chrome/Edge/Safari	No layout or tap issues
Accessibility	Contrast, focus, labels, keyboard, alt	WCAG 2.1 AA checks pass on key templates
Performance	Budget on staging per template	Targets on p. 37 met in lab tests
Security	2FA, roles, updates, backups restore	Restore tested; no admin without 2FA

QA gate

01 All P1 checks pass

↓

02 Client UAT sign-off

↓

03 Backup taken

↓

04 Rollback ready

↓

05 Go-live approved

45 DEPLOYMENT

Cut over in a quiet hour, with a way back.

QUESTION THIS PAGE ANSWERS

How does the new site go live?

T−48 h
lower DNS TTL; content freeze

→

T−24 h
final redirect crawl on staging

→

T−0
deploy release; switch DNS (low-traffic window)

→

T+15 min
smoke test: pages, forms, WhatsApp, tags

→

T+1 h
Search Console sitemap; redirect spot checks

→

T+24 h
first monitoring report

Rollback

Old site kept intact on the old host for 30 days. If a P1 issue can't be fixed within 2 hours, DNS is pointed back.

Access needed

Domain registrar or DNS login, hosting, Google and Meta admin roles, WhatsApp number owner

CLIENT INPUT

Communication

Front desk briefed on new WhatsApp flow and lead log before cutover.

46 30-DAY MONITORING

Five check-ins, one report.

QUESTION THIS PAGE ANSWERS

What happens after launch?

WHEN	CHECKS	OUTPUT
Day 1	Uptime, forms, WhatsApp replies, events, 404s, redirect hits	Fix list
Day 3	Conversion counts vs leads in log; consent rates; sGTM health	Tracking sign-off
Day 7	Search Console coverage, crawl errors, page speed (lab)	SEO check
Day 14	Lead quality from assistant; WhatsApp response times; booking drop-off	Flow tweaks
Day 30	All of the above + first real-user CWV + leads traced end to end	30-day report

Included in the implementation fee. Ongoing optimisation after day 30 (ads, content, CRO) is a separate engagement.

One fee for the work. Third-party costs paid directly.

QUESTION THIS PAGE ANSWERS

What does the clinic pay, and to whom?

INCLUDED

₹40,000

Phase-1 implementation fee

The Phase-1 implementation fee is ₹40,000. It covers the agreed website build and implementation work in this blueprint: the WordPress build, technical SEO, AEO/GEO, local hubs, tracking and analytics, server-side tracking, Meta Pixel and CAPI, WhatsApp and AI-assistant integration, before/after and brand showcase, performance work, QA, deployment, launch and 30-day monitoring. Third-party subscriptions, cloud infrastructure, WhatsApp and AI usage, premium licences and advertising spend are paid directly by the clinic after confirmation. No third-party cost is assumed or hidden inside the implementation fee.

	WHAT	PAID TO
A · Implementation fee	₹40,000 · steps 01–32	Daniel Deepak
B · One-time third-party	Premium theme / plugin licences if chosen	Vendors directly
C · Monthly recurring	Hosting, sGTM hosting, AI assistant platform	Vendors directly
D · Usage-based	WhatsApp messages, AI credits above allowance, cloud above free tiers	Meta / vendors
E · Optional future	Scheduler software, CRM, call tracking, ongoing optimisation, ad spend	As agreed

Payment schedule

As agreed in the engagement letter CLIENT INPUT

Ownership

Every account (hosting, Cloudflare, Google, Meta, WhatsApp, Stape, Voiceflow) is created in or transferred to the clinic's name. Daniel is added as a user.

Planning ranges, labelled as estimates.

QUESTION THIS PAGE ANSWERS

What will the clinic pay vendors each month?

ITEM	TYPE	PLANNING RANGE (EXCL. GST)	
Managed WordPress hosting	C · monthly	≈ ₹800 – ₹3,500 / month (by provider and plan)	ESTIMATE
Cloudflare (DNS, CDN, SSL, Workers)	C · monthly	₹0 on free plan; paid Workers only above free limits	ESTIMATE
Server-side GTM (Stape Pro)	C · monthly	$20/mo list ($17/mo annual) ≈ ₹1,500 – ₹1,800	ESTIMATE
AI assistant · Voiceflow Pro	C · monthly	≈ $60/mo per editor seat + credits ≈ ₹5,300+	ESTIMATE
AI assistant · Landbot (alternative)	C · monthly	Starter $45/mo monthly ($36 annual) ≈ ₹3,200 – ₹4,000	ESTIMATE
WhatsApp Cloud API	D · usage	Utility ₹0.115 · marketing ₹0.8631 per template; service replies free	USAGE-BASED
AI usage above allowance	D · usage	Voiceflow ≈ $0.005 / message above credits	USAGE-BASED
Premium licences (theme, ACF Pro, cache, consent)	B · yearly	≈ ₹0 – ₹20,000 / year depending on choices	ESTIMATE
Email alerts (SMTP)	C · monthly	Free tier usually sufficient	ESTIMATE
Advertising spend	E	Set by the clinic; paid to Google / Meta	—

≈ ₹7–15K

typical monthly running cost, excluding ad spend and GST

ESTIMATE

How it adds up

Hosting ≈ ₹1,500 + Stape ≈ ₹1,700 + Voiceflow ≈ ₹5,300 + WhatsApp ≈ ₹200–1,500 + Cloudflare ₹0. Landbot instead of Voiceflow lowers it.

USD converted at about ₹88. Sources: stape.io/price; Landbot and Voiceflow plan pages as summarised by eesel.ai and activepieces (Oct–Nov 2026); Meta INR rate card effective 1 Oct 2026. Vendor prices can change; each is confirmed with the clinic before purchase.

What could slow or change Phase 1.

QUESTION THIS PAGE ANSWERS

What could go wrong, and what is the plan?

RISK / DEPENDENCY	IMPACT	MITIGATION	OWNER
Meta business verification delayed	WhatsApp API + CAPI start late	Start in week 1; site launches with wa.me links if needed	Clinic + Daniel
WhatsApp templates rejected	Automated first message delayed	Utility wording, no promotional claims; resubmit	Daniel
Meta restricts health-related events	Fewer optimisable events in Meta	Check account in step 18; rely on Lead/Contact + offline	Meta
Patients decline consent	Lower tracked volumes	Report modelled + observed; never bypass consent	—
Fees, doctor bios, wording not supplied	Answer blocks, assistant and WhatsApp can't go live	Input list in week 1; placeholders blocked from launch	Clinic
Before/after consent not available	Fewer or no cases at launch	Launch with consented cases only	Clinic
Brand proof / logo permission missing	Text tiles instead of logos	Text tiles + disclaimer	Clinic
Kalkaji status unclear	Wrong page type	Decide before step 26	Clinic
DNS / registrar access missing	No /gtgtag/ proxy, no cutover	Access in week 1; subdomain fallback for sGTM	Clinic
Third-party price changes	Running cost moves	Quarterly cost check; alternatives listed	Daniel

50 ACCEPTANCE CRITERIA

Phase 1 is complete when all of these are true.

QUESTION THIS PAGE ANSWERS

How do we agree the project is done?

Website + search

- [x] All approved templates live on production
- [x] 96/96 legacy URLs redirected; junk pages removed
- [x] Schema valid on every template; GBP + Apple verified
- [x] Malviya Nagar, Saket, Kalkaji pages live with unique content
- [x] Answer blocks approved on every core page
- [x] Performance targets met in lab tests on key templates

Conversion + automation

- [x] WhatsApp first reply < 30 s in 9 of 10 tests
- [x] Booking request reaches staff < 1 min
- [x] AI assistant passes all scripts incl. safety replies
- [x] Human takeover and STOP work
- [x] Before/after cases each have a consent record
- [x] Brand tiles each have proof on file

Measurement

- [x] 14 events match the spec in GA4 and sGTM
- [x] Google Ads + Meta conversions recorded (browser + server, deduplicated)
- [x] Offline appointment upload tested
- [x] 10 test leads traced from click to status

Privacy + handover

- [x] Payload audit: no health data in marketing tools
- [x] Privacy notice published after clinic review
- [x] All accounts owned by the clinic
- [x] Admin + staff training done; runbook delivered
- [x] 30-day report delivered

51 FINAL DELIVERABLES

Twenty things the clinic receives and owns.

QUESTION THIS PAGE ANSWERS

What exactly is handed over?

01 Production WordPress site + staging	02 Custom theme + components (Git)	03 301 redirect map (96 URLs)	04 Server-side GTM + /gtgtag/ proxy
05 WhatsApp Cloud API + automation	06 AI smile estimator	07 Booking + forms with consent	08 Lead router + lead log
09 GA4, Google Ads, Meta Pixel + CAPI	10 Tracking spec (14 events)	11 Answer block library	12 Schema templates
13 Local hubs ×3	14 Before/after case system	15 Brand showcase	16 GBP + Apple Business Connect
17 Privacy pack (for review)	18 QA report + UAT sign-off	19 Runbook + staff training	20 30-day report

What only the clinic can provide.

QUESTION THIS PAGE ANSWERS
What does the clinic need to do?

ITEM	NEEDED FOR	BY
Admin access: domain/DNS, hosting, Google (GA4, Ads, GTM, Search Console, GBP), Meta Business	Steps 01, 05, 07–08, 14–18, 24	Week 1
Business documents for Meta verification	WhatsApp API, CAPI	Week 1
Approved fee ranges per treatment	Answer blocks, assistant, WhatsApp	Week 2
Doctor details: qualifications, registration, photos	Doctor pages, schema, answers	Week 2
Kalkaji: branch or not; Saket / local photos and reviews with permission	Local hubs	Week 3
Before/after cases with written consent	Case system	Week 4
Brand proof of use + logo permission	Brand showcase	Week 4
Privacy notice + consent wording review by advisor	Launch	Week 6
Staff for the lead log and WhatsApp replies; 1 h training	Launch	Week 7
Purchase of third-party services after confirmation	Steps 05, 07, 11	As scheduled
Timely review: approvals within 3 working days	Whole timeline	Ongoing

About 8 weeks to launch, then 30 days of monitoring.

QUESTION THIS PAGE ANSWERS

When will it be ready?

Meta verification / approvals (external)	▒	▒	▒	▒										

Week 1 starts when approvals, access and payment are in place. External reviews (Meta verification, template approval) and late client inputs can move dates.

Approve the scope, start access and verification this week.

QUESTION THIS PAGE ANSWERS

What should happen next?

01	**Approve Phase-1 scope + fee**	this document, ₹40,000
↓		
02	**Grant access + start Meta verification**	longest external lead time
↓		
03	**Send inputs**	fees, doctors, Kalkaji, cases, brands
↓		
04	**Confirm third-party choices**	hosting, Stape, Voiceflow or Landbot
↓		
05	**Build starts**	week 1

Disclaimers

- No guaranteed rankings, leads, revenue or AI citations
- The AI assistant does not diagnose or give medical advice
- Third-party, WhatsApp and cloud pricing can change and varies with usage
- Performance targets are engineering targets, not guarantees
- Legal and regulatory compliance needs the clinic's professional review
- Before/after content requires appropriate written patient consent
- Brand names and logos follow each owner's trademark and licensing rules

55 CLIENT APPROVAL CHECKLIST

Fifteen approvals before build starts.

QUESTION THIS PAGE ANSWERS

What does the clinic need to approve?

- ☐ **01** Phase-1 scope incl. all 7 core requirements
- ☐ **02** Implementation fee ₹40,000 + payment schedule
- ☐ **03** Third-party services: hosting · sGTM (Stape / DigitalOcean) · Voiceflow or Landbot
- ☐ **04** Account access list (p. 52)
- ☐ **05** Meta business verification documents
- ☐ **06** Fee ranges per treatment
- ☐ **07** Doctor details + photos
- ☐ **08** Kalkaji: branch or patient hub
- ☐ **09** Before/after cases + written consent
- ☐ **10** Brands used + logo permission
- ☐ **11** WhatsApp templates + opt-in wording
- ☐ **12** AI assistant wording + safety reply
- ☐ **13** Privacy notice to the clinic's advisor
- ☐ **14** Cosmetic pages: this site or Delhi Dental Smiles
- ☐ **15** Go-live window
